Introduction

The MANAGE supported programme on Agriclinic and Agribusiness Entrepreneurship which was started in 2008 has come a long way since then. Over the entire period, the CARD has kept to the principle of building and nurturing foundation as the basis for successful agricultural development and agriculture led transformation. We have worked hard to find the right ways to each individual project, and have been fortunate to encounter problems of agriculture graduates. The souvenir captures the progress in our work while covering the ACAB Conclave and Awards that CARD organized in the month of May for multiplying agri sector enterprise and making agriculture attractive and remunerative for the youths in pursuance of the national agenda for food security and skill development in agriculture, horticulture, animal husbandry. This report highlights our progress in the area of venture establishment, hand-holding support, bankers liaison provided to them and achievements.

Agri-preneurship in India, especially in Uttar Pradesh has to achieve more than what has been achieved. The very reason for supporting the accelerated pace of agriculture, animal husbandry, dairy, fisheries and poultry led transformation is the fact the state has abundance of flora and fauna. The bankers have to come forward in supporting the trained ACAB graduates and there is a further need higher degree of interest towards loan sanctioning, so that the pace of eradication of unemployment could be achieved through this model and pace of creation of ecologically safe renewable and nonrenewable energy based sustainable livelihoods and enterprises is further accelerated. The MANAGE supported programmes are novel as there is not much future that is ecologically safe in the urban areas considering the limits to energy that forms the backbone of urban livelihoods and habitats. The new focus on renewable energy and its generation in the rural areas create new opportunities that should be tapped by the agri-entrepreneurs.

It is important to support the agri entrepreneurs and here support of banks are most important. The data set shows diverse rates of bankers' achievements in the past years. There is a disparity between loans sanctioned in North and South India. In southern parts of the country, it is more than 11% loan sanctioning but in the Northern region the rate of loan sanctioning for initiating agriculture based enterprises is low. Considering this, it is important to address the issues through both the bankers and agri-entrepreneurs in order to ensure better ratio for the number of trainees and the number of enterprises that are established with the support of banks following by the subsidy of NABARD.

Since 2008, Centre for Agriculture and Rural Development has considerably expanded its reach, both thematically and geographically. ACAB programmes remain one of the most important programmes for the organization. Other programmes that are flagship programmes with substantial outreach at the national level are training and exposure visit programme under NHM, ATMA, PPV& FRA, exhibitions, publication and advocacy on the critical issues in agriculture that has a bearing on realizing the vision of food and nutritional security in India.

ACAB Conclave was conceived to take a stock of the concerns, challenges and opportunities that agri entrepreneurs. Awarding the best agri entrepreneurs through the launch of First ACAB Awards by Center for Agriculture and Rural Development in collaboration with the partner organization is an initiative to acknowledge the best and support the national vision for multiplication of enterprises in agriculture, horticulture, dairies, fisheries, poultry and allied sectors.

We are thankful to Dr.P.Chandra Shekhra (Director-CAD) for supporting and having faith in CARD during this journey. We express our gratitude to Mr.A.V.Rao and Mr. CJM Reddy for guiding us regularly for making the ACAB programme successful. We express our gratitude to NABARD, JCB and SBI for supporting in organizing the wonderful programme.

Introduction to the ACAB scheme:

In India, rapid agricultural growth continues to be the key to poverty alleviation and overall economic development. In the years to come, the increase in agricultural production will mainly come from the growth and productivity which will invite intervention of agricultural extension activities in providing farmers information, training and support for adopting improved production technologies. In order to strengthen the extension services further and at the same time tap the potential of the unemployed graduates and provide them with employment opportunities by making them entrepreneurs, the scheme of Agri-clinics and Agri-business Centers ***was launched on 9th April, 2002.***

Debut of Centre for Agriculture and Rural Development:

Centre for Agriculture and Rural Development has started Agri-Clinic and Agribusiness Training Programme in 2008 at Indira Nagar, Lucknow. Organization has extensively worked on the field to establish ventures. In 2009, the training has shifted to IABM, Noida. From 2008 to 2013 the organization has established his reputation on the field and uplifted more 200 lives of unemployed agriculture graduates and thus achieved a success rate of more than 44%.

Progress of the Training Programme:

Organisation has trained 53 districts candidates of Uttar Pradesh out of 72. As in 2008, centre shifted to Noida so there is clear impact maximization of trained candidates from western Uttar Pradesh. Among this Agra, Aligarh Mathura, Meerut, Mujaffernagar, Pilibhit and Bareilly are on top. However organization has also penetrated in Uttarakhand and Rajasthan as well.

Hand-holding support:

To achieve success rate and encourage candidates to setup agri-venture it is very important that a proper hand-holding support to be provided to the trained candidates. Organisation providing hand-holding support in best possible manner by regular visits, bankers meeting, linkages with agri-input companies, seminars, workshops, refresher training etc. it is the hand-holding support who has made organization among the top institutions and thus made easy to achieve success rate of 44%.

The efforts were made overall development of the agri-prenuers but the nature of early returns from Agri-input supply, around 41% trained candidates has established agri-input centres. Dairy is the second most important component of agribusiness industry, which an early returns and gives sustainability, around 35% ventures are dairy. Others are poultry, horticulture nursery, bio-fertilizer units etc.

Year on year progress:

As stated above first training programme started in 2008 at Indira Nagar, Lucknow. Graphs below shows that first two years organization was could not trained enough candidates what could have been. From 2010-11 organisation accelerated training programmes and from that time onwards is continuously is on progress. 2012-13 has been golden year in which organization has trained 162 candidates.

Seeing year on year progress of venture established organization has achieved 44% success rate. Two years of beginning has been slower but onwards venture establishment accelerated.

Strategies adopted for mobilize candidates and establish ventures:

Organization has effectively managed hand-holding part apart of that advertisement in news paper done on regular basis. Colleges and universities were covered while promoting IABM.

For increasing success rate and maximize venture established following picture shows our strategies, which has been very effective. Our zonal project coordinators work very hard on field to provide best of best hand-holding support and thus success rate increased.

ACABC Organogram Hierarchy:

Success comes with a great leadership and the group of people who work towards a common goal. The hierarchy is adopted to get maximum result within a stipulated time.
